Under: File -> Options -> Add-ins -> Excel Add-ins -> Excel Add-ins -> Excel workbooks: Open both of the Excel workbooks you want to compare. If it is, run it and see what happens. On Thursday, November 13, 2014 4:59... 8 years ago Run-time error '9': Subscript out of range 8 years ago Error if no MergedDiffs report 8 years ago Run-time error '9': Subscript out of range 8 years ago Error if no MergedDiffs report 8 years ago Run-time error '9': Subscript out of range 8 years ago Run-time error '9': Subscript typically one command macros (Clear excess format; Resize comments) so adding them to a Custom Group works. This IF formula works by comparing two cells from Sheet1 and Sheet2. 8 years ago This will be fixed in the next version. So in my Excel. there are other add-ins that are shown in the add-ins tab as well. some that are xla (pre-2017 add-ins tab as well.) ins) and some xlam (2017+) that I wrote. 8 years ago Start here first, and if that does not fix the issue, take a quick look at the other... I have checked a new install on my computer and it all looks fine. 8 years ago Steve, Your suggestion worked (I also posted a reply to the ticket). 'Add-ins' is a bit special in that any pre-2017 add-ins (before the ribbon UI) will automatically be applied to the default 'Add-ins' tab. The copy in Program Files is there for manual installation. Loads into Excel in the Mac, but whenever I try and run it I am running into problems with the code wanting to access files that just aren't there. 7 years ago Add-in ribbon not displayed 7 years ago That looks right. 6 years ago Here is some more information. If both of the cells have the same contents, the formula will return "No Difference", however, if the contents don't match, the different values will be displayed. As Excel spreadsheets get modified over time new rows and columns can be inserted between existing ones. If you upload to virustotal.com, you will see 2 positives of 60 virus checkers. 5 years ago After installing Spreadsheet Compare, every time I open Excel, I see a small box... This may not sound like a big deal or may seem redundant if it... The Options dialog gives you a choice between comparing formulae or calculated values. The solution Albtross describes, of using the .Text property in the FindMatch method, seems to resolve the issue for date formats as well (as long as both spreadsheets use the same format; if the format is different, I think it's appropriate to flag it as a difference). I got a ton of errors saying it "couldn't add rows without pushing non-blank data off the end of the spreadsheet"?? Will be fixed in the next... My program is an AddIn only, not an external tool. 7 years ago Well this is what opens when I right-click the line in the lower part of Spreadsheet... But it did find the differences. Couldn't be cleaned, thus deleted. I don't have any experience with Mac, so I don't know... 2 years ago I have the same problem. Deleting the upgrade file I mentioned didn't seem... 8 years ago 8 y bars in Excel 2007 8 years ago Rev 1.29.0 released 8 years ago 8 y some time I'll try to work out which of my macros is causing my problems. 7 years ago Try this, How to compare two entire workbooks that consist of multiple pages, your best bet is using a third-party tool, 8 years ago We're close Steve! Have attached the latest merged diff sheet for you. I will make that change in the next version. 8 years ago Percentace change on row decimal places 8 years ago That's exactly how I did it. Clicking the Add button moves those sheets to the pane on the right. runtime 438, windows XP 4 years ago Problems with Office Pro 2003 4 years ago Error 13 Type mismatch if cells are more than 255 chars in key column 4 years ago Excel 2007 VB script opening error after compare instead of the Quick Compare and deleted some previous sessions and it worked (sort of). 8 years ago Error 13 (Type mismatch) in procedure Compare and I get a bottom truncated window. 4 years ago I wanted to suggest adding a description, Author, URL and other information that would show up on the "Add-ins" listing screen. 5 years ago Malwarebytes blocks the update check every time I launch Excel because it thinks your site is infected... -Quick Compare gives result of Microsoft Forms - Cold not load an object becasue it is not available on this machine. Apparently all... Don't forget to subscribe to our newsletter by entering your email address below! Receive the latest technology news in your inbox and be the first to read our tips to become more productive. In the future I do want a clearer indication of what will and will not change the contents of the workbook, but have not decided on how best to accoumplish it without breaking the code. Both CMD and shell install are the same errors. I tried reinstall it, but it's the same. I assumed I would get an email notification when someone responded to my post. You'll see the original sheet updated with the differences highlighted in red, along with a report to show all changes. 8 years ago If the error brought you to the IDE, can you indicate what line the error occurred...
